- A Red Flag Warning is in effect on 09/17/16 at 1000 hours until 09/18/16 at 2000 hours for portions of Los Angeles and Ventura Counties.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

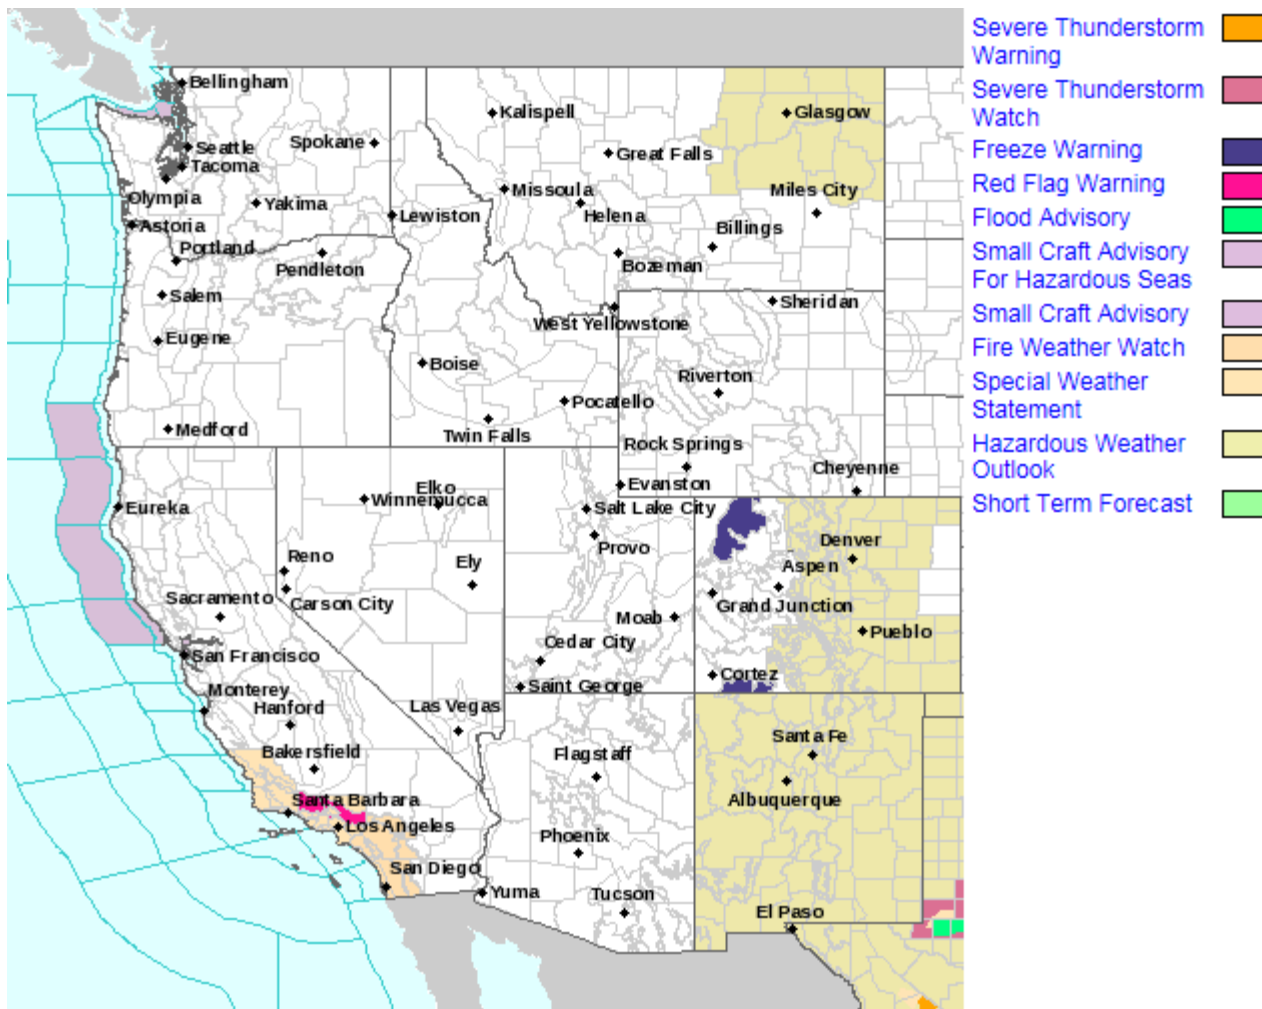

NORTHERN CALIFORNIA

High pressure will continue to hold its grip over the region through Saturday before weakening. Unseasonably warm afternoon temperatures (7-10 degrees above normal) will continue with the warmest inland valleys in the 90s. Today is likely to be the warmest day for the next week. Areas with gusty N to E winds will continue through Saturday night, mostly overnight and during the early morning hours. There will also be very low afternoon relative humidity RH (7-15%) and poor overnight recovery (18-25%) for some areas under this weather pattern. Saturday night the weak southern edge of a Pacific Northwest weather system will brush the far northern areas. A few light showers may occur along the Oregon border as that system passes by Saturday night and Sunday, but warm, sunny, very dry weather will continue for the rest of the region. A stronger, but very dry trough will move into the region with some periods of high cloudiness early next week. Temperatures will cool to seasonable values. Thermal belt conditions seem likely to form. Winds will be quite variable in strength and direction, but for now it appears some gusty westerly afternoon winds will develop. Late next week another high pressure ridge may arrive off the coast and this could bring another round of relatively light, dry north to east winds back to the region. Mild temperatures and low RH values will continue.

SOUTHERN CALIFORNIA

There will be little change in the weather today as a weak trough remains over the region. Maximum temperatures will remain a little below normal, with 70s to low 80s across the mountains and 80s to low 90s in the valleys. Minimum humidity will be mainly between 12% and 25% away from the coast, except there will be widespread single digit humidity in the deserts. A strong ridge of high pressure will build into California from the Pacific Ocean bringing 5 to 10 degrees of warming away from the coast both Saturday and Sunday. The warmer valley locations will be near 105 degrees on Sunday. Minimum humidity will be mainly in the single digits and teens away from the immediate coast this weekend. Light offshore flow will occur this weekend. A weak area of low pressure that will form off the Northern Baja Coast Saturday will move northward bringing isolated to scattered showers and thunderstorms to Southern California Monday and Tuesday. Temperatures will cool and humidity will increase across the entire area early next week. Temperatures will cool further next Wednesday and Thursday as a Pacific trough drops down the West Coast. This trough will also deepen the marine layer along the coast and bring gusty westerly winds to the mountain ridges and desert passes.

WEATHER MAP

Cal OES
GOVERNOR'S OFFICE
OF EMERGENCY SERVICES

Current CAL OES Proclamations

Soberanes, Vegetation Fire, Monterey County

- On 07/26/16, Acting Governor Tom Torlakson issued emergency proclamations for Monterey County due to the effects of the Soberanes Fire.
